Leading stock exchange NSE on Tuesday introduced trading in treasury bills (T-bills) and state development loans (SDLs) in its capital market segment.

In line with equity trading, investors can now buy and sell T-bills and SDLs through NSE trading members, the National Stock Exchange (NSE) said in a statement.

It said dated government securities (G-secs) are already offered in the capital market segment. T-bills and SDLs are both part of the government securities group and have been widely accepted as a safer investment choice. T-bills are issued by the central government whereas SDLs are issued by state governments.

Both are reckoned as eligible investments for banks for the purpose of meeting SLR (Statutory Liquidity Ratio) requirements.

T-bills are issued in three maturities -- 91 days, 182 days and 364 days, whereas SDLs are largely issued in the range of 3 to 35 years, with the majority of issuances taking place in the 10-year maturity segment.

Earlier in 2018, NSE had introduced an online platform to allow retail investors to invest in fresh or re-issuances (primary market) of G-secs and T-bills through the non-competitive bidding mechanism.

The exchange also added SDLs to this facility in November 2019.

In addition to G-secs, now T-bills and SDLs are also offered in the capital market segment, which provides an alternate exit route to these investors who have subscribed through the primary market.

"Availability of a secondary market for these securities would encourage participation in the primary markets. Now all the major government securities including G-sec, SDL and T-bills are offered at NSE in both primary and secondary market platforms," NSE Managing Director and CEO Vikram Limaye, said.

To date, the government securities market is dominated by institutional investors, he added.

According to him, availability of these securities in the capital market segment for trading, coupled with NSE's wide reach, is likely to increase participation of retail investors in this asset class. This will aid in diversifying the investor base for the government securities.

Financial Express
NSE introduces trading of treasury bills, state development loans in capital market segment
In line with equity trading, investors can now buy and sell T-Bills and SDLs through NSE trading members, said the bourse.
29 July 2020

The National Stock Exchange (NSE) on Tuesday announced the start of its trading in treasury bills (T-bills) and state development loans (SDLs) in its capital market segment. In line with equity trading, investors can now buy and sell T-Bills and SDLs through NSE trading members, said the bourse.

NSE said the dated government securities, which are already offered in the capital market segment, started trading from July 27. T-Bills and SDLs are issued by the central government and the state governments, respectively. Both are considered as eligible investments for banks to meet their statutory liquidity ratio (SLR) requirements. T-Bills are issued in three maturities — 91 days, 182 days, and 364 days — whereas SDLs are largely issued in the range of three to 35 years with majority of issuance taking place in the 10-year maturity segment.

Vikram Limaye, managing director and chief executive officer of NSE, said, “Availability of a secondary market for these securities would encourage participation in the primary markets. Now, all the major government securities, including G-sec, SDL and T-bills, are offered at NSE in both primary and secondary market platforms.” He stated that to date the G-sec market was dominated by institutional investors.

In 2018, NSE had introduced the NSE goBID online platform to allow retail investors to invest in fresh or re-issuances of G-secs (primary market) and T-bills through the non-competitive bidding mechanism. From November 2019, NSE added SDLs to this facility. “We believe that with the NSE goBID primary platform and the availability of these securities in the capital market segment for trading, coupled with NSE’s wide reach is likely to increase participation of retail investors in this asset class. This will aid in diversifying the investor base for the G-sec,” said Vikram Limaye.

Earlier in 2018, NSE had introduced an online platform to allow retail investors to invest in fresh or re-issuances (primary market) of G-secs and T-bills through the non-competitive bidding mechanism.

The exchange also added SDLs to this facility in November 2019.

In addition to G-secs, now T-bills and SDLs are also offered in the capital market segment, which provides an alternate exit route to these investors who have subscribed through the primary market.

"Availability of a secondary market for these securities would encourage participation in the primary markets. Now all the major government securities including G-sec, SDL and T-bills are offered at NSE in both primary and secondary market platforms," NSE Managing Director and CEO Vikram Limaye, said.

To date, the government securities market is dominated by institutional investors, he added.

According to him, availability of these securities in the capital market segment for trading, coupled with NSE's wide reach, is likely to increase participation of retail investors in this asset class. This will aid in diversifying the investor base for the government securities.

NSE Introduces Trading of T-bills and SDLs in Capital Market Segment
28 July 2020

National Stock Exchange of India Ltd (NSE), India’s leading stock exchange started trading in T-bills (Treasury Bills) and SDLs (State Development Loans) in its Capital Market Segment. In line with equity trading, investors can now buy and sell T-bills and SDLs through NSE Trading Members. The Dated Government Securities (G-sec) are already offered in Capital Market Segment. The trading started on 27th July 2020.

T-bills and SDLs are both part of the government securities group and have been widely accepted as a safer investment choice. T-bills are issued by the Central Government whereas SDLs are issued by State Governments. Both are reckoned as eligible investments for banks for the purpose of meeting SLR (Statutory Liquidity Ratio) requirements. T-bills are issued in three maturities namely 91 days, 182 days and 364 days whereas SDLs are largely issued in the range of 3 to 35 years with the majority of issuance taking place in the 10 year maturity segment.
Earlier in 2018, NSE had introduced the NSE goBID online platform to allow retail investors to invest in fresh/re-issuances (primary market) of G-secs and T-bills through the non-competitive bidding mechanism. From Nov 2019, NSE also added SDLs to this facility. NSE has facilitated subscription of more than Rs. 240 crores from retail investors in government securities. In addition to G-sec, now T-bills and SDLs are also offered in the capital market segment which provide an alternate exit route to these investors who have subscribed through the primary market.

Vikram Limaye, MD & CEO, NSE said, “Availability of a secondary market for these securities would encourage participation in the primary markets. Now all the major government securities including G-sec, SDL and T-bills are offered at NSE in both primary and secondary market platforms. To date, the government securities market is dominated by institutional investors. We believe that with the NSE goBID primary platform and the availability of these securities in the Capital Market Segment for trading, coupled with NSE’s wide reach is likely to increase participation of retail investors in this asset class. This will aid in diversifying the investor base for the Government of India securities.”
