National Stock Exchange (NSE) and Singapore Exchange (SGX) said on Tuesday they have entered into a formal agreement to cement the key terms for operationalising the NSE IFSC-SGX Connect. The two exchanges will also withdraw arbitration proceedings.

The parties did not elaborate on the terms and structure of the formal agreement, but said the proposed NSE IFSC- SGX Connect will bring together international and Gujarat International Finance Tec-City (GIFT) participants to create a bigger liquidity pool for Nifty products in GIFT City.

In August 2019, the two exchanges had received a set of approved regulatory dispensations from their statutory regulators obtaining their support on a joint proposal that the two exchanges submitted earlier this year.

On Tuesday, the two exchanges said they have recently received further regulatory clarifications from the relevant authorities on implementation of the Connect, and they will continue to work with key stakeholders to develop infrastructure and ensure member readiness prior to its implementation.

Loh Boon Chye, Chief Executive Officer of SGX, said, “Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world.

“As Asia’s pioneering central counterparty, SGX will work with NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers,” said Loh Boon Chye, CEO of SGX.

“The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity,” said Vikram Liamye, managing director and CEO of NSE.

The two exchanges were engaged in a bitter battle for control of the rising business in Indian equity derivatives, and the tussle had even reached the courts in 2018.

As per the proposal, SGX will route the Nifty trades through IFSC, GIFT City. The development will be a shot in the arm for IFSC, enhancing liquidity on the platform significantly. Trading volumes on SGX Nifty and SGX Bank Nifty are roughly the same as what happens onshore on NSE.

With all the regulatory approvals in place, the new platform will go live in the next one year, said people privy to the development. They added that SGX has created a special purpose vehicle (SPV) in IFSC and all the Nifty and Bank Nifty trades happening on SGX will be routed through this SPV into NSE IFSC — a subsidiary of NSE in GIFT City. The settlement will be done by NSE IFSC Clearing Corporation.

"The NSE-SGX Connect... is an important joint financial market initiative by India and Singapore," said Injeti Srinivas, chairman, IFSC Authority.

The government is also learnt to have provided special dispensations. There will be no need for Singapore-based brokers to register with Indian authorities or provide additional KYC documents.

"Given the beneficial cost and tax structure IFSC markets offer, many offshore investors who were waiting for liquidity to increase before participating in the market are now likely to take the plunge," said Suresh Swamy, partner, PWC.

In 2016, SGX took NSE to court after a joint decision by Indian exchanges to stop licensing their indices and providing market data to foreign bourses with the aim of trying to prevent more of the Indian equity derivatives market from going offshore.
Singapore Exchange Ltd. and the National Stock Exchange of India Ltd. are formally ending a years-long disagreement related to derivatives trading, with the two exchanges set to launch a cross-border trading link.

Both exchanges will withdraw arbitration proceedings that began after a dispute erupted in 2018 regarding the trading of Indian stock-based derivatives in Singapore, according to a statement from the Singapore exchange. The exchanges have received another round of regulatory approvals on implementing a connect that will allow market participants to trade NSE Nifty 50 Index futures and options contracts from India’s Gujarat International Finance Tec-City.

This is “definitely a positive outcome for SGX as it allows a bigger pool of clients” even though the Nifty products will cease to trade in Singapore once the platform is operational, said Joel Ng, an analyst at KGI Securities (Singapore) Pte.

The dispute between Singapore and India’s exchanges came to the fore in February 2018, when NSE together with other Indian markets said they would end all licensing agreements with foreign bourses to discourage offshore trading. The two revived talks in July that year, which resulted in the proposal of a cross-border trading link for Nifty 50 index derivatives.

The exchanges received a set of approved regulatory dispensations from their statutory regulators for the connect last year. The related contracts are currently traded on the Singapore bourse. The launch date for the new NSE IFSC-SGX Connect has not been decided yet.

“SGX will work with NSE and stakeholders to develop a connectivity infrastructure,” the exchange’s Chief Executive Officer Loh Boon Chye said in the statement.

“The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity,” added Vikram Limaye, NSE’s chief executive officer.

The country’s premier bourse National Stock Exchange (NSE) and the Singapore Exchange (SGX) have entered into a formal agreement to cement the key terms for operationalising the NSE IFSC-SGX Connect.
This will bring together international and Gujarat International Finance Tec-City (GIFT City) participants to create a bigger liquidity pool for Nifty products in GIFT City.

Both NSE and SGX will also withdraw arbitration proceedings. The two were engaged in arbitration proceedings under the Arbitration and Conciliation Act over the trading of Nifty products for more than two years.

The dispute was triggered after the NSE decided to terminate the Nifty trading pact with the SGX in February 2018. Also, the Singapore bourse's subsequent decision to launch identical India products became a bone of contention.

The BSE, the NSE, and the Metropolitan Stock Exchange (MSE) had jointly decided to cancel their licensing agreements with overseas bourses on offshore derivative contracts. The move was aimed at putting an end to offshore derivatives trading in Indian securities, which were gathering pace on platforms, such as the SGX.

Last year, however, the SGX and the NSE started working on a solution to route SGX Nifty trading volumes through GIFT City.

The two exchanges have recently received regulatory clarifications from relevant authorities on the implementation of the Connect. They had received consent from their respective statutory regulators on the proposed Connect model last year.

Both parties will continue to work with key stakeholders to develop the infrastructure for the Connect and ensure member readiness before its implementation, the two exchanges said in a joint press release.

Vikram Limaye, managing director and chief executive officer of the NSE, said the Connect is one of the key developments for the integration of the GIFT City ecosystem with international financial markets and will lead to the development of vibrant and liquid markets for India-access products at GIFT City. “The Connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT City, resulting in more broad-based development across asset classes and capital-raising activity,” said Limaye.

“Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and, in turn, enhance investments and capital market flows between India and the world. As Asia’s pioneering central counterparty, the SGX will work with the NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers. We look forward to broadening participation and deepening liquidity in Nifty products for international participants, as part of the growth of GIFT City,” said Loh Boon Chye, CEO, SGX.

Currently, the SGX Nifty has open interest of $3-5 billion. Initially, the two exchanges may launch SGX Nifty futures at GIFT City, and then other products can follow.

Injeti Srinivas, chairman, International Financial Services Centres Authority, said the NSE-SGX Connect for funneling trading in NIFTY products at SGX to GIFT IFSC is an important joint financial market initiative by India and Singapore. “This will certainly give a boost to the IFSC ecosystem and promote larger participation in IFSC. The Connect creates a win-win situation for both sides, which makes it possible to have a sustainable and growing partnership between the NSE IFSC and SGX,” said Srinivas.

**NSE-SGX formalise 'GIFT Connect'**

The move comes almost a year after SGX and NSE had reached a truce over trading of Nifty derivatives in Singapore, with the two agreeing to create a new platform for trading these derivatives out of GIFT City.

22 September 2020

The National Stock Exchange of India (NSE) and the Singapore Exchange (SGX) on Tuesday announced the signing of an agreement to cement key terms for operationalising the NSE IFSC-SGX Connect. This will bring together international and GIFT participants to create a bigger liquidity pool for Nifty products at the Gujarat International Finance Tec-City (GIFT) in Gandhinagar.
The move comes almost a year after SGX and NSE had reached a truce over trading of Nifty derivatives in Singapore, with the two agreeing to create a new platform for trading these derivatives out of GIFT.

"...Both NSE and SGX will also withdraw the arbitration proceedings," the two exchanges said in a joint press statement.

The exchanges said they have recently received regulatory clarifications from relevant authorities on the implementation of the so-called Connect. The exchanges did not elaborate on the clarifications sought by Securities and Exchange Board of India (Sebi) and Monetary Authority of Singapore (MAS).

Major details of the Connect are yet to be announced by the exchanges. But those known include revenue sharing model, anti-money laundering norms, client on-boarding, whether some of SGX's clients would set up shop at GIFT.

"Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world," said Loh Boon Chye, chief executive officer of SGX.

According to people aware of the matter, SGX would set up a company at GIFT which will act as a special purpose vehicle (SPV) to facilitate trading of its clients at NSE-IFSC. SGX will act as the clearing member so the bulk of revenues from trades at NSE-IFSC would go to SGX. Trade-off for NSE-IFSC is building liquidity at GIFT in a smaller time-frame.

"The connect creates a win-win situation for both sides, which makes it possible to have a sustainable and growing partnership between NSE IFSC and SGX," said Injeti Srinivas, chairman, IFSC Authority.

"The exchanges also need to find a solution to India's rules to prevent money-laundering. Indian exchanges follow a ‘segregated nominee account structure’ for client accounts, which helps depositories and exchanges identify the ultimate beneficiary of these accounts, SGX allows an 'omnibus account structure’, where regulators get no such information," said the person quoted above.

Vikram Limaye, CEO, NSE said "the connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad-based development across asset classes and capital raising activity".

India's NSE, Singapore's SGX finalise derivatives tie-up

India has been trying to lure foreign investors to the city that offers close to zero tax, dollar contracts, and top-notch infrastructure.

NSE and SGX had been locked in a dispute since 2018 after NSE sought to block SGX's launch of a set of new Indian derivatives products

22 September 2020

India's National Stock Exchange (NSE) and Singapore Exchange Ltd (SGX) have finalised a derivatives tie-up and ended arbitration proceedings relating to a 2018 dispute on SGX's launch of an index derivative, the bourses said on Tuesday.

The tie-up aims to bring trading of the SGX's Nifty futures contract, based on the NSE's blue-chip Nifty 50 index, to GIFT City, an international financial centre in western India. The bourses last year received regulatory approval for the collaboration, which had been under discussion for months.

The exchanges said the deal aims to create a larger pool of liquidity for Nifty products, as well as boost activity at the GIFT City. India has been trying to lure foreign investors to the city that offers close to zero tax, dollar contracts, and top-notch infrastructure.

"The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city," NSE Chief Executive Officer Vikram Limaye said in a statement.

NSE and SGX had been locked in a dispute since 2018 after NSE sought to block SGX's launch of a set of new Indian derivatives products on grounds that the offerings infringed its intellectual property rights.

The National Stock Exchange (NSE) and the Singapore Stock Exchange (SGX) have inked a deal to jointly start trading in Gujarat International Finance Tec-City (GIFT). Simultaneously, the exchanges have withdrawn arbitration proceedings between them. The arbitration was with regard to a dispute over Nifty trading on SGX.

“The NSE International Financial Service Centre (IFSC)-SGX Connect aims to bring together the trading of Nifty products to and create a larger pool of liquidity, comprising international and home market participants,” NSE said in a release.

BusinessLine reported on September 11 that NSE and SGX would soon announce a deal. Although the details of the deal structure have not been divulged, sources that the exchanges will set up a special purpose vehicle (SPV). This SPV will act as a conduit for trading on GIFT for funds based out of Singapore. The two exchanges had recently received regulatory clearances from authorities in India and Singapore for implementing Connect.

“Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world,” said Loh Boon Chye, Chief Executive Officer of SGX.

“We deeply appreciate the continued support provided by the government and regulatory authorities in India and Singapore. We look forward to broadening participation and deepening liquidity in Nifty products for international participants, as part of the growth of GIFT City,” he added.

Vikram Limaye, Managing Director and Chief Executive Officer of NSE, said Connect is one of the key developments for the integration of GIFT City ecosystem with the international financial markets.

Injeti Srinivas, Chairman of International Financial Services Centres Authority, (IFSC Authority), said the NSE-SGX Connect for funneling trading in Nifty Products at SGX to GIFT IFSC is an important joint financial market initiative by India and Singapore.
Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world,” said Loh Boon Chye, Chief Executive Officer of SGX.

“We deeply appreciate the continued support provided by the government and regulatory authorities in India and Singapore. We look forward to broadening participation and deepening liquidity in Nifty products for international participants, as part of the growth of GIFT City,” he added.

Vikram Limaye, Managing Director and Chief Executive Officer of NSE said this Connect is one of the key developments for the integration of GIFT City ecosystem with the international financial markets. According to him, it would lead to development of vibrant and liquid markets for India access products at GIFT City with the ease of access to international investors.

“The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity,” he added.

Injeti Srinivas, chairman of International Financial Services Centres Authority, (IFSC Authority), said the NSE-SGX Connect for funneling trading in Nifty Products at SGX to GIFT IFSC is an important joint financial market initiative by India and Singapore.

This will certainly give a boost to the IFSC ecosystem and promote larger participation, he added.

**NSE, SGX pact to boost Nifty liquidity**

22 September 2020

The National Stock Exchange (NSE) and Singapore Exchange (SGX) have entered into a formal agreement to cement the key terms for operationalising the NSE IFSC-SGX Connect which will bring together international and Gujarat International Finance Tec-City (GIFT) participants to create a bigger liquidity pool for Nifty products in GIFT City.

Both NSE and SGX have also decided to withdraw the arbitration proceedings.
The exchanges have recently received further regulatory clarifications from the relevant authorities on the implementation of the Connect, since receiving consent from their respective statutory regulators on the proposed Connect model last year, as per a statement. Both parties will continue to work with key stakeholders to develop the infrastructure for the Connect and ensure member readiness prior to its implementation, it added.

Bloomberg
Singapore, India Bourses to End Arbitration, Push Trading Link
22 September 2020

Singapore Exchange Ltd. and the National Stock Exchange of India Ltd. are formally ending a years-long disagreement related to derivatives trading, with the two exchanges set to launch a cross-border trading link.

Both exchanges will withdraw arbitration proceedings that began after a dispute erupted in 2018 regarding the trading of Indian stock-based derivatives in Singapore, according to a statement from the Singapore exchange. The exchanges have received another round of regulatory approvals on implementing a connect that will allow market participants to trade NSE Nifty 50 Index futures and options contracts from India’s Gujarat International Finance Tec-City.

This is “definitely a positive outcome for SGX as it allows a bigger pool of clients” even though the Nifty products will cease to trade in Singapore once the platform is operational, said Joel Ng, an analyst at KGI Securities (Singapore) Pte.

The dispute between Singapore and India’s exchanges came to the fore in February 2018, when NSE together with other Indian markets said they would end all licensing agreements with foreign bourses to discourage offshore trading. The two revived talks in July that year, which resulted in the proposal of a cross-border trading link for Nifty 50 index derivatives.

The exchanges received a set of approved regulatory dispensations from their statutory regulators for the connect last year. The related contracts are currently traded on the Singapore bourse. The launch date for the new NSE IFSC-SGX Connect has not been decided yet.

“SGX will work with NSE and stakeholders to develop a connectivity infrastructure,” the exchange’s Chief Executive Officer Loh Boon Chye said in the statement. “The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity,” added Vikram Limaye, NSE’s chief executive officer.

Reuters
NSE, Singapore's SGX finalise derivatives tie-up
22 September 2020

India’s National Stock Exchange (NSE) and Singapore Exchange Ltd (SGX) have finalised a derivatives tie-up and ended arbitration proceedings relating to a 2018 dispute on SGX’s launch of an index derivative, the bourses said on Tuesday.
The tie-up aims to bring trading of the SGX’s Nifty futures contract, based on the NSE’s blue-chip Nifty 50 index, to GIFT City, an international financial centre in western India. The bourses last year here received regulatory approval for the collaboration, which had been under discussion for months.
The exchanges said the deal aims to create a larger pool of liquidity for Nifty products, as well as boost activity at the GIFT City. India has been trying to lure foreign investors to the city that offers close to zero tax, dollar contracts, and top-notch infrastructure.

Financial Times
Singapore and India exchanges end dispute over derivatives
Asian bourses will launch trading link after calling time on long-running legal tussle
24 September 2020

Hudson Lockett in Hong Kong and Stefania Palma and Mercedes Ruehl in Singapore YESTERDAY 0 Print this page The stock exchanges of Singapore and India have ended a long-running battle over derivatives and agreed to launch a trading link across the two markets, marking a substantial improvement in relations between the Asian bourses. Singapore Exchange said it had agreed with the National Stock Exchange of India to push ahead with a market connect platform, and that both sides would withdraw from arbitration proceedings over the trading of Indian equity derivatives in the south-east Asian city-state. SGX had been
the main overseas provider of derivatives for India stocks prior to the bourses falling out in 2018, when Indian exchanges announced they would stop supplying data to foreign index providers. At the time, Indian bourses including NSE said the popularity of derivatives in Singapore that are used to hedge exposure to the south Asian country’s equities had resulted “in migration of liquidity from India, which is not in the best interests of Indian markets”. SGX and NSE said on Wednesday that they had received regulatory approvals for a proposed scheme to allow trading of SGX’s NSE Nifty 50 index futures and options from Gift, a financial centre in the Indian state of Gujarat. The exchanges did not provide a launch date for the platform. Loh Boon Chye, SGX chief executive, said the link between Singaporean and Indian markets would “facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world”. The move to strengthen ties with NSE comes as SGX faces pressure to compete with Hong Kong. Hong Kong Exchanges and Clearing, which operates the city’s stock market, in May snatched SGX’s derivatives licensing agreements with index provider MSCI. The Hong Kong bourse also plans to offer trading of futures contracts for Chinese onshore shares similar to those already offered in Singapore.

Hong Kong will soon play host to part of the initial public offering of Chinese payments platform Ant Group — set to be one of the world’s largest ever equity raisings. “With this agreement sorted out it could be a positive point for Singapore and could definitely mitigate our current losses in terms of competitiveness to [Hong Kong],” said Kelvin Wong, a market analyst at CMC. But Gabriel Sacks, a Singapore-based investment director at Aberdeen Standard Investments, said the announcement would not move the needle for SGX. “It mostly removes an overhang on a small percentage of SGX’s revenue.” The broader impact on SGX’s earnings is unclear. “There are no details of the terms of the agreement yet, such as how the revenue will be shared between SGX and NSE,” he said. Singapore’s exchange is seeking to build a more balanced platform after years of delistings and low trading volumes have squeezed its core equity listings business. As part of its diversification efforts, SGX has launched a derivatives platform with FTSE International tracking Taiwan’s stock market and plans to expand its presence in global foreign exchange. In July SGX acquired the remaining 80 per cent stake in BidFX, a trading venue used by hedge funds and banks, for $128m.

SGX, NSE cement plans for Gift City connect

22 September 2020

The National Stock Exchange of India (NSE) and Singapore Exchange (SGX) have dropped arbitration proceedings to bring their plan for a connect model for the trading of Nifty products in India’s Gujarat International Finance TecCity, known as GIFT City, closer to operation.

The two exchanges received regulatory approval for the plan last year, which would allow members from both exchanges to trade Nifty derivatives in India’s International Financial Services Centre (IFSC) while clearing through their respective central counterparties.

At the time, SGX’s chief executive Loh Boon Chye (pictured) said he was optimistic that the proposal would go ahead as planned, despite legal tensions relating to India’s ban on licensing securities data and indices to foreign exchanges, directly impacting the Nifty futures traded on SGX.

In a statement on Tuesday, the exchanges said they had entered a formal agreement to operationalise the NSE IFSC-SGX Connect after receiving regulatory clarifications on implementing the model and withdrawing arbitration proceedings.

Bringing together international and GIFT City participants will create a bigger liquidity pool there, the exchanges say.

“Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world,” Loh said.

“SGX will work with NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers.”
In their statement, SGX and NSE said they will continue to work with key stakeholders to develop the infrastructure for the Connect and ensure member readiness prior to its implementation.

“This Connect is one of the key developments for the integration of GIFT City ecosystem with the international financial markets,” said NSE’s chief executive Vikram Limaye. “It would lead to development of vibrant and liquid markets for India access products at GIFT City with the ease of access to international investors.

“The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity.”

The Nifty 50 index represents the weighted average of 50 of the largest Indian companies listed on NSE.

Asia Asset Management
Singapore, India bourses end feud, plan channel to link with financial centre in Gujarat
24 September 2020

Singapore Exchange (SGX) and India’s largest bourse are formally ending their long-running dispute over trading of Indian derivatives in the city state, and will work on their plan to connect the exchanges with an international financial centre in the Indian state of Gujarat.

It marks the close of the clash triggered in 2018 when SGX moved to develop products based on India’s Nifty stock market index after two Indian bourses, including Mumbai-based National Stock Exchange (NSE), announced they would stop providing data feeds to foreign exchanges to halt the drain of liquidity from India.

NSE obtained an interim injunction against SGX from the Bombay High Court, which ordered them into arbitration. The arbitrator asked SGX to continue listing and trading Nifty contracts past the deadline set by NSE, and barred it from offering the planned new products until a final decision was made.

Just over a year ago, SGX and NSE first announced their plan to develop a channel to connect the bourses with the International Financial Services Centre (IFSC) and the Gujarat International Finance Tech City or GIFT City that forms part of the centre.

They have now agreed to end arbitration proceedings and have signed a formal agreement to “cement the key terms for operationalising the NSE IFSC-SGX Connect”, the Singapore bourse says in a statement on September 22.

According to SGX, the channel will bring together both global and IFSC investors “to create a bigger liquidity pool for Nifty products in GIFT City”. The bourses will continue to work with key stakeholders to develop the infrastructure and ensure member readiness before it’s launched. No timeline is provided.

SGX Chief Executive Officer Loh Boon Chye says building connectivity across international platforms in Singapore and India will facilitate unfettered access to Nifty derivatives products for global investors.

“This, in turn, enhance investments and capital market flows between India and the world,” he says in the statement. “As Asia’s pioneering central counterparty, SGX will work with NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers.”

Vikram Limaye, managing director and chief executive officer of NSE, adds that the move is “one of the key developments for the integration of GIFT City ecosystem with the international financial markets”, and will help develop “vibrant and liquid” markets for Indian investment products.

https://www.asiaasset.com/post/23827-sgxnseconnect-gte-0923
Singapore Exchange (SGX) and India’s National Stock Exchange (NSE) have taken the next step towards the NSE IFSC-SGX Connect.

Both exchanges entered into a formal agreement on September 22 to cement the key terms for operationalising the NSE IFSC-SGX Connect, which will bring together international and Gujarat International Finance Tec-City (GIFT) participants to create a bigger liquidity pool for Nifty products in GIFT City.

Both NSE and SGX will also withdraw the arbitration proceedings. In May 2018, SGX and NSE went to court in India to settle its dispute where NSE tried to prevent SGX from launching new derivatives products to address SGX’s loss of Nifty 50 futures contracts.

Both exchanges have also recently received further regulatory clarifications from the relevant authorities on the implementation of the Connect. They received consent from their respective statutory regulators on the proposed Connect model in 2019.

“Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world,” says SGX CEO Loh Boon Chye.

“As Asia’s pioneering central counterparty, SGX will work with NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers,” Loh adds.

Vikram Limaye, the managing director and CEO of NSE says, “This Connect is one of the key developments for the integration of GIFT City ecosystem with the international financial markets. It would lead to development of vibrant and liquid markets for India access products at GIFT City with the ease of access to international investors”.

“The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity,” he adds.

The Business Times

SGX and India's National Stock Exchange drop arbitration, agree to work on trading link

THE Singapore Exchange (SGX) and India's National Stock Exchange (NSE) have inked a formal agreement over their planned new trading model for Nifty futures contracts, the two parties said in a joint statement on Tuesday.

They have now agreed to work out key terms for the NSE International Financial Service Centre (IFSC)-SGX Connect, which will see Nifty futures contracts on the SGX executed in the Gujarat International Finance Tec-City (Gift City). Both sides have noted that statutory regulators, which agreed to the proposed model last year, recently doled out fresh clarifications on how the Connect will be rolled out.

The exchanges, which had earlier aimed to have trades up and running by the end of this year, said they "will continue to work with key stakeholders to develop the infrastructure for the Connect and ensure member readiness prior to its implementation".

"SGX will work with NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers," said SGX chief executive Loh Boon Chye in the statement.

Putting to rest a legal dispute that has stretched on since the offshore trading saga began, the two bourse operators have also withdrawn arbitration proceedings.
India's main stock exchanges decided in early 2018 to stop licensing their securities or sharing data with foreign exchanges, dealing a shock blow to products such as the SGX's popular Nifty 50 index futures contracts. The Gujarat tie-up was then raised as an alternative link, under which Nifty trade orders from Singapore will be routed through an SGX special-purpose vehicle in Gift City - a tax-exempt off-shore destination in India. The plan is for the NSE IFSC-SGX Connect to create a bigger liquidity pool for Nifty products.

NSE chief executive and managing director Vikram Limaye said the Connect "will broaden the international and domestic participant base and further strengthen the capital market ecosystem in Gift City, resulting in more broad-based development across asset classes and capital-raising activity".

Strait Times

**Singapore, India bourses agree to end dispute, push trading link**

23 September 2020

SINGAPORE (BLOOMBERG) - The Singapore Exchange (SGX) and the National Stock Exchange of India (NSE) are formally ending a years-long disagreement related to derivatives trading, with the two bourses set to launch a cross-border trading link.

Both exchanges will withdraw arbitration proceedings that began after a dispute erupted in 2018 regarding the trading of Indian stock-based derivatives in Singapore.

The exchanges have received another round of regulatory approvals on implementing a connection that will allow market participants to trade NSE Nifty 50 Index futures and options contracts from India's Gujarat International Finance Tec-City (Gift City).

"SGX will work with NSE and stakeholders to develop a connectivity infrastructure," SGX chief executive officer Loh Boon Chye said in a statement on Tuesday (Sept 22).

NSE CEO Vikram Limaye said: "The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in Gift City, resulting in more broad-based development across asset classes and capital-raising activity."

Mr Joel Ng, an analyst at KGI Securities (Singapore), said that this is "definitely a positive outcome for SGX as it allows a bigger pool of clients" even though the Nifty products will cease to trade in Singapore once the platform is operational.

The dispute between Singapore's and India's exchanges came to the fore in February 2018, when NSE, together with other Indian markets, said it would end all licensing agreements with foreign bourses to discourage offshore trading. The two revived talks in July that year, which resulted in the proposal of a cross-border trading link for Nifty 50 index derivatives.

The exchanges received a set of approved regulatory dispensations from their statutory regulators for the trading link last year. Nifty derivative contracts were the third-largest contributor to SGX's equity-derivatives volume in fiscal year 2020. The launch date for the new NSE IFSC-SGX Connect has not been decided yet.

The Trade

New trading link in Singapore and India to end spat between exchange groups
A disagreement over market data and derivatives trading between SGX and India’s NSE has been resolved as plans to launch a trading link have been cemented.
23 September 2020

A two-year dispute between Singapore Exchange (SGX) and India’s National Stock Exchange (NSE) over derivatives and market data will come to an end as both venues have agreed to form a new trading link. SGX and NSE said in a statement that they would both withdraw arbitration proceedings after formally agreeing to cement terms for launching the NSE International Financial Service Centre (IFSC)-SGX Connect. The link will enable both SGX and NSE IFSC members to access Nifty derivatives in Gujarat International Finance Tech (GIFT) City and manage exposures through their respective clearing providers.

“Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world,” commented Loh Boon Chye, CEO of SGX.

“As Asia’s pioneering central counterparty, SGX will work with NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers.”

The dispute between SGX and NSE began in February 2018 when three exchange operators said they would stop licensing their market data and indices to foreign investors, throwing SGX’s flagship futures index into question.

NSE argued that the data products licensed to foreign exchanges had led to a migration of derivatives trading from the country. Some of the licensing agreements were terminated with immediate effect raising alarms at the time that trading on other exchanges could be disrupted.

Shortly after, SGX revealed plans to launch new derivatives products for Indian equities in June to replace its existing Nifty futures. However, NSE responded with legal action and applied for an interim injunction on the products, forcing SGX to delay the launch.

Upon receiving certain regulatory approvals in August last year, SGX and NSE said they were working to discontinue arbitration proceedings while stating the Connect would help create a larger pool of liquidity for Nifty products for international and local market participants.

“This Connect is one of the key developments for the integration of GIFT City ecosystem with the international financial markets. It would lead to the development of vibrant and liquid markets for India access products at GIFT City with the ease of access to international investors,” said Vikram Limaye, CEO of NSE, in the most recent update on the plans.

“The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad-based development across asset classes and capital raising activity.”

Singapore Exchange and the National Stock Exchange of India are putting an end to a multi-year dispute on derivative trading and launching a cross-border trading link.

Both exchanges will formally withdraw arbitration proceedings for a dispute that first began in February 2018 over Singapore-based trading of a derivative linked to an Indian stock, according to a statement.

At the time, the National Stock Exchange of India (NSE) and other Indian markets said they would scrap licensing agreements with foreign bourses to discourage offshore before talks revived in July that year that resulted in a cross-border trading derivative link proposal with the Singapore Exchange (SGX).

Cross-Border Trading Link

The proposal has led to a cross-border trading link that will allow SGX participants to trade NSE Nifty 50 Index futures and options contracts from India’s Gujarat International Finance Tec-City. The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad-based development across asset classes and capital raising activity, said NSE CEO Vikram Limaye.

SGX will work with NSE and stakeholders to develop a connectivity infrastructure, added SGX CEO Loh Boon Chye.

NSE and SGX progress on operationalising NSE IFSC-SGX Connect

The National Stock Exchange (NSE) and the Singapore Exchange (SGX) have entered into a formal agreement to cement the key terms for operationalising the NSE IFSC-SGX Connect which will bring together international and Gujarat International Finance Tec-City (GIFT) participants to create a bigger liquidity pool for Nifty products in GIFT City.

Accordingly, both the NSE and the SGX will also withdraw the arbitration proceedings.

The two exchanges have recently received further regulatory clarifications from the relevant authorities on the implementation of the Connect, since receiving consent from their respective statutory regulators on the proposed Connect model last year.

Both parties will continue to work with key stakeholders to develop the infrastructure for the Connect and ensure member readiness prior to its implementation.

"Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn, enhance investments and capital market flows between India and the world. As Asia’s pioneering central counterparty, the SGX will work with the NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers," Loh Boon Chye, Chief Executive Officer of the SGX, said.

"We deeply appreciate the continued support provided by the government and regulatory authorities in India and Singapore. We look forward to broadening participation and deepening liquidity in Nifty products for international participants, as part of the growth of GIFT City," he added.

Vikram Limaye, Managing Director and Chief Executive Officer of NSE said "This Connect is one of the key developments for the integration of GIFT City ecosystem with the international financial markets. It would lead to development of vibrant and liquid markets for India access products at GIFT City with the ease of access to international investors."

"Our collaboration with the SGX is an important step towards fulfilling the vision of Aatmanirbhar Bharat as envisaged by Prime Minister of India with GIFT IFSC playing a much larger role in the global financial markets," he said.
The Connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity.

The two exchanges (NSE and SGX) have been locked in a dispute for the past couple of years after India's three main bourses unexpectedly announced in February 2018 that they would stop licensing their indexes to foreign bourses from August that year.

NSE's Nifty futures and options, which are traded in the island nation, are popular with foreign investors who are not keen on trading in India.

An Indian court that year referred the dispute to an arbitrator. The two parties have now reached an agreement for operationalising the NSE IFSC-SGX Connect and thereby withdraw the arbitration proceedings.

NSE’s Nifty futures and options, which are traded in the island nation, are popular with foreign investors who are not keen on trading in India.

An Indian court that year referred the dispute to an arbitrator. The two parties have now reached an agreement for operationalising the NSE IFSC-SGX Connect and thereby withdraw the arbitration proceedings.

India has been trying to attract foreign investors to the city that offers close to zero tax, top-notch infrastructure, and dollar contracts. SGX and NSE had been locked in a quarrel since 2018 after NSE decided to block SGX's launch of a set of innovative Indian derivative products. In any case as everything arranged up, India’s National Stock Exchange (NSE) and Singapore Exchange Ltd (SGX) have settled for a derivatives tie-up and ended negotiation proceedings relating to a 2018 dispute on SGX’s launch of an index derivative. The tie-up targets to bring trading of the SGX’s Nifty futures contract based on NSE’s blue-chip Nifty 50 index. This has been given to GIFT City which is an international financial center in western India. Both the bourses received regulatory approval for the collaboration last year which subsequently led to the discussions that had been carrying on for months.

Both of the exchanges said the deal aims to create a large pool of liquidity for Nifty products and to boost activities at GIFT City. India has been trying to attract foreign investors to the city that offers close to zero tax, top infrastructure, and dollar contracts.

NSE Chief Executive Officer Vikram Limaye said that the association will widen the domestic and international participant base and further strengthen the capital market ecosystem in Gift city. SGX and NSE had been locked in a quarrel since 2018 after NSE decided to block SGX’s launch of a set of new Indian derivative products on grounds that the offerings infringed its intellectual property rights.

The dispute between Singapore and India’s exchanges came to the front in February 2018. At that time NSE together with other Indian markets said that they would end all licensing agreements with foreign bourses to decrease offshore trading. The two bourses again resumed talks in July which resulted in the proposal of a cross-border trading link for nifty 50 index derivatives.

The exchanges received a set of approved regulatory dispensations from their statutory regulators for the connection in last year. The launch date for the new NSE IFSE-SGX Connect is yet to be decided. SGX will work with NSE and stakeholders to build up a connectivity infrastructure as per the exchange’s Chief Executive Officer Loh Boon Chye said in the statement.

Both exchanges will withdraw arbitration proceedings that began after a dispute erupted in 2018 regarding the trading of Indian stock-based derivatives in Singapore, according to a statement from the Singapore exchange.

नयी दिल्ली, 22 सितंबर (भाषा) नेशनल स्टॉक एक्सचेंज (एनएसई) और सिंगापुर एक्सचेंज (एसजीएसई) ने 'एनएसई ऑर्डिफाइडएक्स-एसजीएसई कंनेक्ट' को परिचालन में लाने की शर्त की मजबूती के लिए एक आधिकारिक समझौते पर हस्ताक्षर किए। एनएसई ने मंगलवार को बताया कि इससे गिफ्ट सिटी में निफ्टी उत्पादों की खरीद- फर्स्ट बेहतर होगी। अंतरराष्ट्रीय वित्त सेवा केंद्र (एसजीएसई) के गुजरात में अहमदाबाद के निकट गिफ्ट सिटी में स्थापित है। ‘एनएसई ऑर्डिफाइडएक्स-एसजीएसई कंनेक्ट’ का लक्ष्य गिफ्ट सिटी में निफ्टी उत्पादों के कारोबार को महसूस किया जा रहा है। इसे अंतरराष्ट्रीय एवं घरेलू बाजार प्रतिभागियों को मिलाकर बाजार में खरीद- फर्स्ट बेहतर हो जाएगा। वर्तमान में हर एक एक्सचेंज ने एक सोची जानकारी दी है। दोनों एक्सचेंज को कंनेक्ट के निर्माताओं का लेखा होता है। वहाँ अंतरराष्ट्रीय कंपनियों के लिए योगदान मिलता है। इससे पहले सिल्वाल उन्हें सावधानियों से प्रत्यक्षित कंनेक्ट मॉडल को लेकर सहमति मिली थी। दोनों एक्सचेंज अपने हिस्साबाधिकारी के साथ मिलकर कंनेक्ट के लिए यूनियन अंचल बनाने और इसे कारोबारी से पहले सदस्यों को इसके लिए तैयार करना सुनिश्चित करेगी। दोनों एक्सचेंज को हाल ही में कंनेक्ट को शुरू करने के लिए संबंधित प्रावधान करने हेतु भी हुई है। एसजीएसई के मुख्य कार्यालय अधिकारी लोह बुला चे ने कहा कि सिंगापुर और भारत में}

एनएसई व एसजीईक्स ने किया समझौता

date: सुंदर 23, 2020

नेशनल स्टॉक एक्सचेंज (एनएसई) और सिंगापुर एसजीईक्स (एसजीईक्स) ने एनएसई और एसजीईक्स को अलग के रूप में लाने के लिए ओप्शनल सामग्रीक समझौते पर हस्ताक्षर किए हैं। यह इंटरनेशनल व गिफ्ट सिटी के भागीदारों को गिफ्ट सिटी में निफ्टी प्रोडक्ट की खातिर बढ़ा नकद की धारा बनाने के लिए एक साथ लाएगा। एनएसई और एसजीईक्स इसके अंतर्गत आर्थिक और वित्तीय विवरण आवेदन वापस ले गए।

दोनों एक्सचेंज दो साल बाद ज्यादा समय से निफ्टी प्रोडक्ट की टेंडिंग के मामले में आर्थिक वार्तालाप में लगे हुए थे। यह विवाद तब पूरा हुआ था जब एनएसई ने फरवरी 2018 में एसजीईक्स के साथ निफ्टी टेंडिंग करार समाप्त करना का फैसला लिया। साथ ही सिंगापुर एसजीईक्स का भारत के समस्त उत्तराखंड पेश करने के फैसले ने भी विवाद को और बढ़ा दिया।

बीएसई, एनएसई और मेट्रोपोलिटन स्टॉक एक्सचेंज ने संयुक्त रूप से ऑफशोर डोर्स्टोटिव कॉर्टेक्ट पर विवेचना एक्सचेंजों के साथ लाइफ सिग्नाँ करार रह रहने का फैसला लिया था। पर कदम भारतीय प्रतिभूति में ऑफशोर डोर्स्टोटिव की समाप्ति के एडस के साथ उठाया गया था, जो एसजीईक्स जैसे लोटफॉर्म्स पर फैसला पड़ा रहा था।

पिछले साल हालांकि दोनों एक्सचेंजों ने गुरुनाल के पिट लिफ्ट देने के मामले में जिए एसजीईक्स निफ्टी टेंडिंग वार्ता की खातिर समाधान करने का काम सुरू किया था। दोनों एक्सचेंजों का हाल में संबंधित प्राथमिकता से केंद्रबंद करने के लिए सामाजिक संयोजन समूह के साथ चर्चा की जा रही थी। दोनों परीक्षा केंद्र के लिए बुनियादी ढांचा विकसित करने की खातिर प्रमुख विषयों के साथ योजना रखा गया था और इसके कृतियों से पहले कार्यक्रम का केंद्रीय साधन की तैयारी सुनिश्चित करने थे।

दोनों एक्सचेंजों ने संयुक्त प्रतिशत विक्रय में वे बार करनी है।

एनएसई के प्रबंध निदेशक और मुख्य कार्यालय के विक्रम लिम्पे ने कहा कि गिफ्ट सिटी के इंटरनेशनल पारिवर्तित कॉर्टेक्ट के साथ जोड़ने के लिए केंद्रबंद अहम प्रमाण में से एक है और यह भारत के लिए वाइक्रेट व लिकेट मुक्त की जा सकती है। केंद्रबंद अंतरराष्ट्रीय व देशी भागीदारों को आधार बनाना और गिफ्ट सिटी में पूर्वी बाजार को मजबूत बनाना, जिससे विभिन्न परिस्थितियों में वर्तमान और पूर्वी भागीदारों की गतिविधियों का विस्तार होगा।

एसजीईक्स के मुख्य कार्यालय के एल. वी. बॉन्ड ने कहा, सिंगापुर व भारत में इंटरनेशनल पोर्टफॉलियो पर केन्द्रित होकर जीवंत बाजार के प्रतिभूतियों को सुधार निर्माणा और इसके बदले भारत व बाकी दुनिया के बीच निकस्क के पूर्वी बाजार के प्रवाह में इजाफा होगा। केन्द्रित होकर बूंदी दौड़ बढ़ते हैं, एसजीईक्स के साथ मिलकर काम करेंगा।

अभी एसजीईक्स निफ्टी में 3 से 4 अरब डॉलर के खाने संदेह है। शुरू में दोनों एसजीईक्स गिफ्ट सिटी में एसजीईक्स निफ्टी प्रमुख पेश कर सकते हैं और बाकी देशों उसके बाद ये स्वागत कर सकते हैं।

एनएसई-एसजीएम के गिफ्ट केनेक्ट को औपचारिक रूप दिया

यह कदम लाभकर्ता के लिए एक मौका बना है जब एसजीएम और एनएसई निकटकर ट्रेडिंग की दुरुस्ती को तकनीकी तृप्ति के लिए दोनों फंक्शन को गिफ्ट करने के लिए एक नया ऑब्जेक्ट सिस्टम बनाने पर सहमति बनी।

SGX, NSE formalise agreement to operationalise ‘Connect’
23 September 2020

The Connect will bring trading of SGX Nifty products to GIFT City to create a larger pool of liquidity, comprising both foreign and domestic market participants.

India’s NSE (National Stock Exchange) and SGX (Singapore Exchange) have entered into an agreement formalising the key terms for operationalising the NSE IFSC-SGX Connect.

NSE and SGX will also withdraw arbitration proceedings resulting from a 2018 dispute over SGX’s planned launch of new Nifty products after Indian bourses stopped issuing data licences to foreign bourses.

To resolve the dispute, the exchanges last year agreed to route trading of SGX’s Nifty futures contract to GIFT City, India’s international financial services centre. Under the arrangement, SGX would route trades through a special purpose vehicle which would be registered as a broker with NSE-IFSC.

SGX would act as the clearing member to facilitate clients’ trading, allowing it to receive a greater share of revenue, while NSE-IFSC will benefit from being able to build liquidity in a shorter time frame.

The NSE IFSC-SGX Connect model received regulatory approval last August.

On Tuesday (22 September), the two exchanges said they have recently received further regulatory clarifications on the implementation of the Connect, and that they would continue to work with key stakeholders to develop the infrastructure required and ensure member readiness prior to implementation. “Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world,” said SGX chief executive Loh Boon Chye.

According to NSE managing director and chief executive Vikram Limaye, the Connect is a key development to facilitate the integration of the GIFT City ecosystem with international financial markets.

“The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity,” he said.

https://www.regulationasia.com/sgx-nse-formalise-agreement-to-operationalise-connect/
In a move that has the potential to bring India on the international financial map, the country’s largest exchange National Stock Exchange (NSE) has decided to tie-up with Singapore Exchange Ltd (SGX) for launching various products from Gujarat International Finance Tec-City (GIFT City).

The tie-up ends arbitration proceedings relating to a 2018 dispute on SGX’s launch of an index derivative. The two will now be able to bring trading of the popular 24x7 SGX’s Nifty futures contract to GIFT City. SGX will set up an SPV in the GIFT City and through its association with NSE will launch the present traded SGX Nifty in India.

Though the agreement has been signed, it will still take a year for the first contract to be traded in India, said an NSE official in a discussion with Moneycontrol.

While the move will improve India’s standing as a financial destination, Indian retail traders will not benefit from it, at least as of now. This is because the exchange is in a Special Economic Zone (SEZ) which would mean investments in foreign currency.

Though an Indian can avail the benefit of Liberalised Remittance Scheme (LRS) and invest $250,000 a year in stocks traded in any exchanges or asset classes abroad, they cannot invest in the international market through GIFT City. The amount can be used for investment only and not speculation. RBI’s definition does not cover derivatives under the investment gamut and the money cannot be used as margin money. Unless these rules are changed GIFT City is as far as Nasdaq or Wall Street, from an Indian trader’s point of view.

However, there is a year before the first contract will be traded in the country. Till such time there is already a product in GIFT City that is attracting traders’ attention. Sensex 50, BSE’s flagship index that is traded on India International Exchange (India INX) is seeing keen interest. According to Sameer Patil, Director, India International Exchange, total turnover has significantly increased from US$ 24 billion in March 2020 to US$ 60.2 billion and US$ 57.7 billion registered in July and August 2020, with a market share of 57 percent against the comparable index in Singapore.

While over 100 proprietary traders are active on the exchange more than 40 members are currently active with more in the pipeline as they await regulatory approvals, said Patil.

GIFT City has an inherent advantage that will attract traders. According to Patil, in the International Financial Services Centre (IFSC), setting up of branches has been allowed for banks, depository and other financial services intermediaries. Once the same, i.e., allowing foreign brokers to set up branches is permitted in capital markets by SEBI, more participation from foreign brokers and investors will be seen.

The IFSC zone provides a very competitive cost of operation with the best tax regime, single-window clearance, relaxed Company Law provisions, International Arbitration Centre with overall facilitation of doing business, a legal system based on the principles of the English law, independent regulatory framework consistent with internationally recognised standards, depth and breadth in financial services and instruments and English as a working language.

Patil says there is a keen interest from overseas markets like Hong Kong in India INX, due to the recent developments. Patil says many FPIs have approached them and the India INX regulators to move their base from Hong Kong to GIFT city.

From a trader’s point of view, the two main advantages are no taxes and lower margins on products traded on the exchange – in line with international norms. Since GIFT City has been declared as an SEZ, there are no taxes.

Further, though India INX currently is regulated by SEBI, a new regulator is being set up which will oversee the functioning of the exchange. In any case, the margining norms are better in India INX presently. For every contract of Sensex 50 values being traded at 11,715 on Wednesday, the margin requirement is 9.50 percent or around $1,120. A Nifty contract on the other hand attracts a margin of nearly 15 percent.

The India INX and its rules are just what an Indian trader wants, but bureaucratic hurdles are preventing entry of retail traders because RBI fears fund round-tripping.
Thankfully, steps are being taken to revive GIFT City with the recent appointment of a Chairman of IFSC Authority (IFSCA), Injeti Srinivas, who has been tasked in kick-starting the Prime Minister’s pet project, with the PMO taking a special interest in it.

The government is aware of the bottlenecks and is taking steps to breathe life into GIFT City which includes the launch of more products, extending the liberalized remittance scheme (LRS) for derivatives trading and margin payments, a one-point local dollar clearing mechanism, facilitating retail non-resident Indian participation and doing away with requirements for setting up a broking or trading entity at GIFT.

India INX is also considering the trading of gold bullion, a commodity in which India is the second-largest importer in the world. Government officials are working out methods to ensure that trading at IFSC can happen from anywhere.

With Sensex 50 already witnessing good volumes and SGX Nifty being shifted to the GIFT City, the chances of India emerging as a global financial hub look bright.

**NSE and SGX progress on operationalising NSE IFSC-SGX Connect**

22 September 2020

The National Stock Exchange (NSE) and the Singapore Exchange (SGX) have entered into a formal agreement to cement the key terms for operationalising the NSE IFSC-SGX Connect which will bring together international and Gujarat International Finance Tec-City (GIFT) participants to create a bigger liquidity pool for Nifty products in GIFT City.

Accordingly, both the NSE and the SGX will also withdraw the arbitration proceedings.

The two exchanges have recently received further regulatory clarifications from the relevant authorities on the implementation of the Connect, since receiving consent from their respective statutory regulators on the proposed Connect model last year.

Both parties will continue to work with key stakeholders to develop the infrastructure for the Connect and ensure member readiness prior to its implementation.

“Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn, enhance investments and capital market flows between India and the world. As Asia’s pioneering central counterparty, the SGX will work with the NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers,” Loh Boon Chye, Chief Executive Officer of the SGX, said.

“We deeply appreciate the continued support provided by the government and regulatory authorities in India and Singapore. We look forward to broadening participation and deepening liquidity in Nifty products for international participants, as part of the growth of GIFT City,” he added.

Vikram Limaye, Managing Director and Chief Executive Officer of NSE said: “This Connect is one of the key developments for the integration of GIFT City ecosystem with the international financial markets. It would lead to development of vibrant and liquid markets for India access products at GIFT City with the ease of access to international investors.”
“Our collaboration with the SGX is an important step towards fulfilling the vision of Aatmanirbhar Bharat as envisaged by Prime Minister of India with GIFT IFSC playing a much larger role in the global financial markets,” he said.

The Connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity.

The two exchanges (NSE and SGX) have been locked in a dispute for the past couple of years after India’s three main bourses unexpectedly announced in February 2018 that they would stop licensing their indexes to foreign bourses from August that year.

NSE’s Nifty futures and options, which are traded in the island nation, are popular with foreign investors who are not keen on trading in India.

An Indian court that year referred the dispute to an arbitrator. The two parties have now reached an agreement for operationalising the NSE IFSC-SGX Connect and thereby withdraw the arbitration proceedings.

I wish to thank the Government of India, SEBI, IFSC Regulatory Authority, GIFT City administrative authorities and the government and regulatory authorities in Singapore for their guidance and support.”

India’s National Stock Exchange (NSE) and Singapore Exchange Ltd (SGX) have finalised a derivatives tie-up and ended arbitration proceedings relating to a 2018 dispute on SGX’s launch of an index derivative, the bourses said on Tuesday.

The tie-up aims to bring trading of the SGX’s Nifty futures contract, based on the NSE's blue-chip Nifty 50 index, to GIFT City, an international financial centre in western India. The bourses last year here received regulatory approval for the collaboration, which had been under discussion for months.

The exchanges said the deal aims to create a larger pool of liquidity for Nifty products, as well as boost activity at the GIFT City. India has been trying to lure foreign investors to the city that offers close to zero tax, dollar contracts, and top-notch infrastructure.

“The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city,” NSE Chief Executive Officer Vikram Limaye said in a statement.

NSE and SGX had been locked in a dispute since 2018 after NSE sought to block SGX’s launch of a set of new Indian derivatives products on grounds that the offerings infringed its intellectual property rights.

I wish to thank the Government of India, SEBI, IFSC Regulatory Authority, GIFT City administrative authorities and the government and regulatory authorities in Singapore for their guidance and support."

Shri Injeti Srinivas, Chairman, International Financial Services Centres Authority, (IFSC Authority) said, "The NSE-SGX Connect for funneling trading in NIFTY Products at SGX to GIFT IFSC is an important joint financial market initiative by India and Singapore. This will certainly give a boost to the IFSC Eco System and promote larger participation in IFSC. The connect creates a win-win situation for both sides, which makes it possible to have a sustainable and growing partnership between NSE IFSC and SGX"

https://m.dailyhunt.in/news/india/english/business+sandesh+english-epaper-bussanen/nse+and+sgx+progress+on+nse+ifsc+sgx+connect-newsid-n216689836
The National Stock Exchange of India (NSE) and the Singapore Exchange (SGX) on Tuesday announced the signing of an agreement to cement key terms for operationalising the NSE IFSC-SGX Connect. This will bring together international and GIFT participants to create a bigger liquidity pool for Nifty products at the Gujarat International Finance Tec-City (GIFT) in Gandhinagar.

The move comes almost a year after SGX and NSE had reached a truce over trading of Nifty derivatives in Singapore, with the two agreeing to create a new platform for trading these derivatives out of GIFT. "...Both NSE and SGX will also withdraw the arbitration proceedings," the two exchanges said in a joint press statement.

The exchanges said they have recently received regulatory clarifications from relevant authorities on the implementation of the so-called Connect. The exchanges did not elaborate on the clarifications sought by Securities and Exchange Board of India (Sebi) and Monetary Authority of Singapore (MAS).

Major details of the Connect are yet to be announced by the exchanges. But those known include revenue sharing model, anti-money laundering norms, client on-boarding, whether some of SGX's clients would set up shop at GIFT.

"Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world," said Loh Boon Chye, chief executive officer of SGX.

According to people aware of the matter, SGX would set up a company at GIFT which will act as a special purpose vehicle (SPV) to facilitate trading of its clients at NSE-IFSC. SGX will act as the clearing member so the bulk of revenues from trades at NSE-IFSC would go to SGX. Trade-off for NSE-IFSC is building liquidity at GIFT in a smaller time-frame.

"The connect creates a win-win situation for both sides, which makes it possible to have a sustainable and growing partnership between NSE IFSC and SGX," said Injeti Srinivas, chairman, IFSC Authority.

"The exchanges also need to find a solution to India's rules to prevent money-laundering. Indian exchanges follow a 'segregated nominee account structure' for client accounts, which helps depositories and exchanges identify the ultimate beneficiary of these accounts, SGX allows an 'omnibus account structure', where regulators get no such information," said the person quoted above.

Vikram Limaye, CEO, NSE said "the connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad-based development across asset classes and capital raising activity".

**NSE and SGX progress on NSE IFSC-SGX Connect**

22 September 2020

National Stock Exchange (NSE) and Singapore Exchange (SGX) have entered into a formal agreement to cement the key terms for operationalising the NSE IFSC-SGX Connect which will bring together international and Gujarat International Finance Tec-City (GIFT) participants to create a bigger liquidity pool for Nifty products in GIFT City. Both NSE and SGX will also withdraw the arbitration proceedings.

The two exchanges have recently received further regulatory clarifications from the relevant authorities on the implementation of the Connect, since receiving consent from their respective statutory regulators on the proposed Connect model last year. Both parties will continue to work with key stakeholders to develop the infrastructure for the Connect and ensure member readiness prior to its implementation.

Loh Boon Chye, Chief Executive Officer of SGX, said, “Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world. As Asia’s pioneering central counterparty, SGX will work with NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers. We deeply appreciate the continued support provided by the government and regulatory authorities in India and Singapore. We look forward to broadening participation and deepening liquidity in Nifty products for international participants, as part of the growth of GIFT City.”

Vikram Limaye, Managing Director and Chief Executive Officer of NSE said, “This Connect is one of the key developments for the integration of GIFT City ecosystem with the international financial markets. It would lead to the development of vibrant and liquid markets for India access products at GIFT City with the ease of access to international investors. Our collaboration with SGX is an important step towards fulfilling the vision of Atmanirbhar Bharat as envisaged by our Honourable Prime Minister of India with GIFT IFSC playing
a much larger role in the global financial markets. The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad-based development across asset classes and capital raising activity. I wish to thank the Government of India, SEBI, IFSC Regulatory Authority, GIFT City administrative authorities and the government and regulatory authorities in Singapore for their guidance and support.”

Shri Injeti Srinivas, Chairman, International Financial Services Centres Authority, (IFSC Authority) said, “The NSE-SGX Connect for funnelling trading in NIFTY Products at SGX to GIFT IFSC is an important joint financial market initiative by India and Singapore. This will certainly give a boost to the IFSC Eco System and promote larger participation in IFSC. The connect creates a win-win situation for both sides, which makes it possible to have a sustainable and growing partnership between NSE IFSC and SGX”

“We deeply appreciate the continued support provided by the government and regulatory authorities in India and Singapore. We look forward to broadening participation and deepening liquidity in Nifty products for international participants, as part of the growth of GIFT City,” he added.

Vikram Limaye, Managing Director and Chief Executive Officer of NSE said: “This Connect is one of the key developments for the integration of GIFT City ecosystem with the international financial markets. It would lead to development of vibrant and liquid markets for India access products at GIFT City with the ease of access to international investors.”

“Our collaboration with the SGX is an important step towards fulfilling the vision of Aatmanirbhar Bharat as envisaged by Prime Minister of India with GIFT IFSC playing a much larger role in the global financial markets,” he said.

The Connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity.

The two exchanges (NSE and SGX) have been locked in a dispute for the past couple of years after India’s three main bourses unexpectedly announced in February 2018 that they would stop licensing their indexes to foreign bourses from August that year.

NSE’s Nifty futures and options, which are traded in the island nation, are popular with foreign investors who are not keen on trading in India.

An Indian court that year referred the dispute to an arbitrator. The two parties have now reached an agreement for operationalising the NSE IFSC-SGX Connect and thereby withdraw the arbitration proceedings.
The two exchanges have recently received further regulatory clarifications from the relevant authorities on the implementation of the Connect, since receiving consent from their respective statutory regulators on the proposed Connect model last year.

Both parties will continue to work with key stakeholders to develop the infrastructure for the Connect and ensure member readiness prior to its implementation.

"Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn, enhance investments and capital market flows between India and the world. As Asia's pioneering central counterparty, the SGX will work with the NSE and stakeholders to develop a connectivity infrastructure that incorporates international best practices and creates new value for existing and new customers," Loh Boon Chye, Chief Executive Officer of the SGX, said.

"We deeply appreciate the continued support provided by the government and regulatory authorities in India and Singapore. We look forward to broadening participation and deepening liquidity in Nifty products for international participants, as part of the growth of GIFT City," he added.

This will bring together international and Gujarat International Finance Tec-City (GIFT City) participants to create a bigger liquidity pool for Nifty products in GIFT City

Singapore Exchange Ltd. and the National Stock Exchange of India Ltd. are formally ending a years-long disagreement related to derivatives trading, with the two exchanges set to launch a cross-border trading link.

Both exchanges will withdraw arbitration proceedings that began after a dispute erupted in 2018 regarding the trading of Indian stock-based derivatives in Singapore, according to a statement from the Singapore exchange. The exchanges have received another round of regulatory approvals on implementing a connect that will allow market participants to trade NSE Nifty 50 Index futures and options contracts from India’s Gujarat International Finance Tec-City.

This is “definitely a positive outcome for SGX as it allows a bigger pool of clients” even though the Nifty products will cease to trade in Singapore once the platform is operational, said Joel Ng, an analyst at KGI Securities (Singapore) Pte.

The dispute between Singapore and India’s exchanges came to the fore in February 2018, when NSE together with other Indian markets said they would end all licensing agreements with foreign bourses to discourage offshore trading. The two revived talks in July that year, which resulted in the proposal of a cross-border trading link for Nifty 50 index derivatives.

The exchanges received a set of approved regulatory dispensations from their statutory regulators for the connect last year. The related contracts are currently traded on the Singapore bourse. The launch date for the new NSE IFSC-SGX Connect has not been decided yet.

India, Singapore Exchanges Revive Talks as Regulators Intervene

“SGX will work with NSE and stakeholders to develop a connectivity infrastructure,” the exchange’s Chief Executive Officer Loh Boon Chye said in the statement.
Singapore Exchange Ltd. and the National Stock Exchange of India Ltd. are formally ending a years-long disagreement associated to derivatives buying and selling, with the two exchanges set to launch a cross-border buying and selling hyperlink.

Both exchanges will withdraw arbitration proceedings that started after a dispute erupted in 2018 concerning the buying and selling of Indian stock-based derivatives in Singapore, in accordance to an announcement from the Singapore exchange. The exchanges have acquired one other spherical of regulatory approvals on implementing a join that may enable market individuals to commerce NSE Nifty 50 Index futures and choices contracts from India’s Gujarat International Finance Tec-City.

This is “definitely a positive outcome for SGX as it allows a bigger pool of clients” though the Nifty merchandise will stop to commerce in Singapore as soon as the platform is operational, stated Joel Ng, an analyst at KGI Securities (Singapore) Pte.

The dispute between Singapore and India’s exchanges got here to the fore in February 2018, when NSE along with different Indian markets stated they might end all licensing agreements with overseas bourses to discourage offshore buying and selling. The two revived talks in July that 12 months, which resulted within the proposal of a cross-border buying and selling hyperlink for Nifty 50 index derivatives.

The exchanges acquired a set of accredited regulatory dispensations from their statutory regulators for the join final 12 months. The associated contracts are at the moment traded on the Singapore bourse. The launch date for the brand new NSE IFSC-SGX Connect has not been determined but.

India, Singapore Exchanges Revive Talks as Regulators Intervene

“SGX will work with NSE and stakeholders to develop a connectivity infrastructure,” the change’s Chief Executive Officer Loh Boon Chye stated within the assertion.

“The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity,” added Vikram Limaye, NSE’s chief executive officer.
This is “definitely a positive outcome for SGX as it allows a bigger pool of clients” even though the Nifty products will cease to trade in Singapore once the platform is operational, said Joel Ng, an analyst at KGI Securities (Singapore) Pte.

NSE, SGX sign pact on Connect model to deepen liquidity of Nifty products in GIFT City
22 September 2020

Leading bourse NSE and Singapore Exchange (SGX) have entered into a formal agreement to cement the key terms for operationalising the NSE IFSC-SGX Connect, a move that will deepen liquidity in Nifty products, the Indian bourse said on Tuesday. The NSE International Financial Service Centre (IFSC)-SGX Connect aims to bring together the trading of Nifty products to Gujarat International Finance Tech-City (GIFT) and create a larger pool of liquidity, comprising international and home market participants. In addition, NSE and SGX will withdraw the arbitration proceedings, the Indian exchange said in a statement.

The two exchanges have recently received further regulatory clarifications from the relevant authorities on the implementation of the Connect, since receiving consent from their respective statutory regulators on the proposed Connect model last year. Both exchanges will continue to work with key stakeholders to develop the infrastructure for the Connect and ensure member readiness prior to its implementation.

“Building connectivity across international platforms in Singapore and India will facilitate unfettered access for global market participants, and in turn enhance investments and capital market flows between India and the world,’ said Loh Boon Chye, Chief Executive Officer of SGX. 'We deeply appreciate the continued support provided by the government and regulatory authorities in India and Singapore. We look forward to broadening participation and deepening liquidity in Nifty products for international participants, as part of the growth of GIFT City,’ he added.

Vikram Limaye, Managing Director and Chief Executive Officer of NSE said this Connect is one of the key developments for the integration of GIFT City ecosystem with the international financial markets. According to him, it would lead to development of vibrant and liquid markets for India access products at GIFT City with the ease of access to international investors. 'The connect will broaden the international and domestic participant base and further strengthen the capital market ecosystem in GIFT city resulting in more broad based development across asset classes and capital raising activity,’ he added.

Injeti Srinivas, chairman of International Financial Services Centres Authority, (IFSC Authority), said the NSE-SGX Connect for funneling trading in Nifty Products at SGX to GIFT IFSC is an important joint financial market initiative by India and Singapore. This will certainly give a boost to the IFSC ecosystem and promote larger participation, he added.

National Stock Exchange (NSE) and Singapore Exchange (SGX) have entered into a formal agreement to cement the key terms for operationalising the NSE IFSC-SGX Connect which will bring together international and Gujarat International Finance Tec-City (GIFT) participants to create a bigger liquidity pool for Nifty products in GIFT City.
