NSE's buying spree continues with investment in machine learning start-up

17 March 2021

MUMBAI: The National Stock Exchange, which recently acquired financial data provider Cogencis Information Services and TalentSprint, today announced investment in a machine learning start-up Capital Quant Solutions. The investment by the country's largest stock exchange has been done through its subsidiary NSE Data & Analytics. "The investment in CQS is a part of NSE's program for investment in the fields of analytics, digital, robotics, security, artificial intelligence, machine learning, blockchain etc., where start-ups require early stage financing and incubation to expand and realize their full potential," said Managing Director and Chief Executive Officer Vikram Limaye. Capital Quants Solutions is a technology start-up that provides software products using machine learning and natural language proficiency to analyse structured information from complex financial documents. The stock exchange has been on an investment spree recently as it acquired financial data provider Cogencis earlier this year for Rs 140 crore and deep technology education company TalentSprint for an undisclosed amount. The exchange had also acquired a 26 per cent stake in Indian Gas Exchange, a unit of Indian Energy Exchange earlier this month.

NSE invests in technology startup Capital Quant Solutions

The investment in CQS is a part of NSE's programme for investment in the fields of analytics, digital, robotics, security, among others, where startups require early stage financing and incubation to expand, and realize their full potential, CEO of NSE said

17 March 2021

National Stock Exchange of India, through its subsidiary, NSE Data & Analytics Ltd, has made investment in a technology startup Capital Quant Solutions Ltd (CQS).

"The investment in CQS is a part of NSE's programme for investment in the fields of analytics, digital, robotics, security, artificial intelligence, machine learning, blockchain etc., where startups require early stage financing and incubation to expand, and realize their full potential" Vikram Limaye, CEO of NSE, said in a statement on Wednesday. CQS is a technology startup, focused on providing of software products that use Machine Learning and Natural Language Proficiency to help build models for extracting data from complex unstructured financial documents. Through such partnerships with select start-ups, NSE Group aims to further strengthen its technology leadership. Pravin Lal, founder of Capital Quants Solutions said "Our relationship with the exchange started with NSE being a customer for our flagship product, FinStinct. Over time this relationship has grown not just in terms of the size of the engagement but has also grown at a strategic level. Today, we offer cognitive automation to various functions & divisions within the exchange and we also have the exchange as an investor in us."

NSE Data invests in technology startup Capital Quant Solutions

17 March 2021

NSE Data and Analytics, a wholly-owned subsidiary of leading stock exchange NSE, on Wednesday said it has invested in technology startup Capital Quants Solutions Ltd (CQS). CQS is an India-based technology startup focused on providing software products using machine learning and natural language proficiency that help in extracting and analysing structured information and building machine learning models for extracting data from complex unstructured financial documents.

The investment in CQS is a part of NSE's program for investment in the fields of analytics, digital, robotics, security, artificial intelligence, machine learning and blockchain, where startups require early-stage financing and incubation to expand and realise their full potential," Vikram Limaye, MD and CEO at NSE, said in a statement. Through such partnerships with select startups, which have demonstrated technological potential, the National Stock Exchange of India (NSE) Group aims to further strengthen its technology leadership, he added.

According to him, these fields present innovative solutions and breakthrough technologies, which could potentially change the future of capital markets in India and the world. Our relationship with the exchange started with NSE being a customer for our flagship product, FinStinct.

Over time this relationship has grown not just in terms of the size of the engagement but has also grown at a strategic level. Today we offer cognitive automation to various functions and divisions within the exchange and we also have the exchange as an investor in us," said Pravin Lal, Founder, CQS.
