1. For which stocks special pre-open session is applicable?

The special pre-open session is applicable to the below type of securities:

- IPOs securities - first day of trading. This also includes SME IPOs
- Re-listed Securities – first day of recommencement of trading. (as defined under para 1(C) of SEBI circular no. SEBI/Cir/ISD/1/2010 dated September 2, 2010)
- Stocks having derivatives contracts on the Ex-date of trading after undergoing corporate restructuring*

**Corporate Restructuring: Merger, demerger. Amalgamation, capital reduction/consolidation, scheme of arrangement, in terms of the Companies Act and/or as sanctioned by the Courts, in cases of rehabilitation packages approved by the Board of Industrial and Financial Reconstruction under Sick Industrial Companies Act and in cases of Corporate Debt Restructuring (CDR) packages by the CDR Cell of RBI.*

2. What are the market timings of special pre-open session?

The below are the timings for special pre-open session:

Pre-open2 session	Time	Remark
Order Entry Period	9:00 am - 9:45 am (*)	<ul style="list-style-type: none">• Order entry, Modification and Cancellation• (*) System driven Random closure between 44th and 45th minute
Order Matching & trade Confirmation Period	9:45 am(*) – 9:55 am	<ul style="list-style-type: none">• (*) Order matching period will start immediately after completion of order collection period.• Opening price determination.• Order matching and trade confirmation.
Buffer Period	9:55 am – 10:00 am	<ul style="list-style-type: none">• Transition from pre-open to Normal market

3. What type of orders are allowed in special pre-open session?

- Only Limit orders are accepted

4. How is the order matching mechanism in this session?

- Order matching period will start immediately after completion of order collection period.
- Order will be matched at a single (equilibrium) price which will be open price.
- Eligible buy limit orders will be matched with eligible sell limit orders
- During order matching period order modification, order cancellation, trade modification and trade cancellation will not be allowed. The trade details will be disseminated to respective members immediately after matching of trades.

5. On what basis the opening price is determined?

- The opening price shall be determined based on the principle of demand and supply mechanism.
- The equilibrium price will be the price at which the maximum volume is executable.
- The equilibrium price determined in call auction of pre-open 2 session is considered as open price for the day.

6. What if one or more price meets the criteria of determining the equilibrium price?
- In case more than one price meets the said criteria, the equilibrium price will be the price at which there is minimum order imbalance quantity (unmatched order quantity). The absolute value of the minimum order imbalance quantity will be taken into consideration.
 - In case more than one price has same minimum order imbalance quantity, the equilibrium price will be the price closest to the base price. In case the base price is the mid-value of pair of prices which are closest to it, then the base price itself will be taken as the equilibrium price.
7. What happens to unmatched orders which are entered in the call auction 2 session?
- In case of IPO and SME IPO securities:
- All unmatched limit orders within applicable price range in the pre-open 2 session will be moved in the normal market session at their limit price on the basis of the price-time priority.
 - This transfer will be done irrespective of equilibrium price discovered or not.
- In case of Re-listed Securities:
- In case of equilibrium price is determined, all unmatched orders within applicable price range will be moved to the normal market at their limit price on the basis of the price time priority.
8. What happens if the equilibrium price is not discovered?
- For IPO security:
- The security will move to normal market at the base price (issue price) of the security
- For Relisted security:
- If the equilibrium price is not determined, all the orders shall cancelled by the system.
 - Security will not be available for trading in normal market if equilibrium price is not determined in any of the Exchange
 - The pre-open 2 session for the said security will be conducted on subsequent trading day.
- For stocks having derivatives contracts prior to undergoing corporate restructuring:
- In case equilibrium price is not discovered, all the outstanding orders shall be cancelled and the stock shall continue to trade in special pre-open session on the first day until the price is determined.
9. Is there any price band applicable in this session?
- No Price bands are applicable in the special Pre-open session.
 - However in order to prevent members from entering orders at non-genuine prices in such securities based on Pre-trade risk control guidelines, the Exchange sets the dummy circuit filter i.e. operating range
10. What is the dummy circuit filter/operating range in special pre-open session?
- The initial dynamic price bands shall be set uniformly in co-ordination with other Exchanges in the range of 25% to 75% as the case may be.
11. Will operating range be flexed/relaxed in special pre-open session?
- Yes, it shall be flexed in consultation with other Exchanges
12. How operating range/dummy price band is flexed/relaxed during the session?
- The Exchanges shall flex the operating range / dummy price bands in multiples of 10%

13. Where shall I receive the information related to applicable base price & applicable operating range?

- Base price is visible in market inquiry screen (F11) on TWS in the field name “Close”.
- Applicable operating range shall be made available in security.gz file downloaded to market participants based on the set price band.
- Applicable operating range for the said security shall be displayed on TWS screen (shift + F8) in the field name “DPR”.

14. How will I know that the security has been flexed / relaxed during call auction special pre-open session?

- Following message shall be broadcasted on trading system post any flexing/relaxing of operating range.

“Attn: Members: Please note that the <Lower / Upper> range for <Security> <Series> is being relaxed from <Original %> to <New %> in call auction special pre-open session”

- Revised operating range for the said security shall be displayed on TWS screen (shift + F8) in the field name “DPR”.

15. What happens to my order if the order price is beyond the set/relaxed operating range?

- It shall result in price freeze which shall be subsequently cancelled by Exchange.
- An illustration is provided below for better clarity :

Time	Base Price (Rs)	Operating Range (Rs)	Order Entered at price (Rs)	Result
09:00 am	100	90 - 110	95	Accepted
			105	Accepted
			85	Will result in price freeze
			115	Will result in price freeze
09:10 am	100	75 - 110	80	Accepted
			110	Accepted
			45	Will result in price freeze
			120	Will result in price freeze

16. What is the base price fixed for the security for special pre-open session?

Srno	For	Base Price
1	IPOs (including SME)	Issue Price
2	Re-listed Securities	a) First day of commencement of trading Last cum price of existing security on NSE
		b) Direct listing / MOU / securities admitted for trading under permitted category Last available price of the security on the respective Exchange
